
Liver Human+Mouse
Liver 4 species
Testis Human+Mouse
protein identity π
log₁₀ dN/dS
LOEUF
ESM-2 distance
EVEE (−log variance)
profile correlation
specificity similarity
expression level
cell-type specificity τ
coding length
Δα
count evidence S_g
columns in the order of the rows
ρ
gray: no value
gene groups: median and interquartile range
housekeeping
core machinery
mitochondrially encoded
transcription factors
interferon, inflammatory
extracellular
xenobiotic, bile acid
mitochondrially encoded
ρ = −0.06
ρ = +0.08
ρ = −0.16
ρ = −0.10
ρ = −0.27
ρ = +0.21
ρ = +0.16
ρ = −0.01
ρ = +0.14
protein identity π
LOEUF
EVEE (−log variance)
profile correlation
genes with count evidence
genes without (Δα imputed from features)
median in 14 equal-count bins
genes beyond an axis
