liver level (H1)
result: loss
liver pattern (H3)
result: tie
testis level (H2)
result: loss
testis pattern (H4)
result: loss
profile correlation
rank-matched level per cell type
specificity similarity
gene features alone
profile correlation, clusters of Chimera's latent
gene-level tools (vs Δα mean of 3 seeds, on the genes each tool scores)
SATURN gene score, native genes
SATURN gene score, 1:1 orthologs
CAMEX gene-embedding cosine
−0.4 −0.2 0.0 0.2
difference in ρ_ρ, Δα minus comparator (95% CI; thin: simultaneous)
← comparator closer to independent measure
Δα closer →
