placebo sets, unaltered fits
sham move
both species thinned 4-fold
S_g (Chimera)
Δα, protein-feature gate
Δα, per-gene gate
Δα, gate + per-gene bias
profile correlation, clusters of Chimera's latent
S_g without masking (exploratory)
labelled direct margin
profile correlation
profile correlation (residual)
rank-matched level per cell type
specificity similarity
fold change
gene features alone
SATURN gene score
SATURN weight cosine
CAMEX gene-embedding cosine
GeneSpectra
CACIMAR
SAMap
identity π
dN/dS
LOEUF
expression
liver
testis
kidney
