Count evidence S_g
$\Delta\alpha$, protein-feature gate
Detection gap (no model)
$\Delta\alpha$, per-gene gate
Pseudobulk profile correlation
Cortex: Human-specific DE, MTG (Jorstad 2023) (n 316)
Cortex: Human vs chimpanzee DE, MTG (Jorstad 2023) (n 285)
Cortex: Ape vs macaque DE, cingulate (Caglayan 2023) (n 475)
Cortex: Human-specific DE, cingulate (Caglayan 2023) (n 416)
Cortex: Human-specific DE, ACC (Khrameeva 2020) (n 365)
Cortex: Human-mouse divergent, MTG/VISp (Hodge 2019) (n 351)
Islet: Human-enriched in beta cells (Benner 2014) (n 210)
Islet: Mouse-enriched in beta cells (Benner 2014) (n 234)
Kidney: Species-specific, glomerulus (He 2021) (n 65)
Kidney: Human-enriched, fetal (Kim 2024) (n 262)
Kidney: Mouse-enriched, fetal (Kim 2024) (n 284)
Testis: Stage-unique, human-mouse (Shami 2020) (n 1007)
Testis: Phase-shifted, human-mouse (Shami 2020) (n 1000)
Testis: Stage-unique, human-macaque (Shami 2020) (n 586)
Liver: Non-conserved zonation, hepatocytes (Aizarani 2019) (n 119)
Lung*: Primate-depleted (Tabula Microcebus) (n 279)
Lung*: Primate-enriched (Tabula Microcebus) (n 394)
Lung*: Human vs mouse DE (Travaglini 2020) (n 341)
Marrow*: Primate-enriched (Tabula Microcebus) (n 395)
Cortex*: Human-only subclass markers (Bakken 2021) (n 477)

Stratified AUROC, published species-different genes vs matched genes
(< 0.5: placed below genes of equal expression, cell-type specificity and protein identity; * same data as the cohort)
