level change (fold of thinning, f = 8)
AUROC against matched controls
Liver
Testis
Kidney
power at 5% false positives
all 3 cohorts
count evidence $S_g$
Δα, protein-feature gate
Δα, per-gene gate
Δα, gate + per-gene bias
profile correlation, clusters of Chimera's latent
$S_g$ without masking (exploratory)
labeled direct margin, no model
profile correlation
profile correlation (residual)
rank-matched level per cell type
specificity similarity
fold change
gene features alone
SATURN gene score
SATURN weight cosine
CAMEX gene-embedding cosine
GeneSpectra
CACIMAR
SAMap
protein identity π
dN/dS
LOEUF
expression level
random
AUROC
power
1
0.9
0.8
0.7
0.6
≤ 0.5
0.75
0.5
0.25
≤ 0.05
expression quartile (1 lowest, 4 highest)
expression quartile
Liver
Testis
Kidney
AUROC, third expression quartile
fold of thinning, f
count evidence $S_g$
Δα, protein-feature gate
Δα, per-gene gate
profile correlation, clusters of Chimera's latent
labeled direct margin, no model
profile correlation
rank-matched level per cell type
fold change
