liver Human+Monkey vs testis Human+Macaque
mitochondrially encoded genes
Spearman ρ = -0.002, n = 8,366
sign differs in 51% of genes
(expected if unrelated: 50%)
Δα in testis (raw prior, centered)
Δα in liver (raw prior, centered)
liver Human+Mouse vs testis Human+Mouse
Spearman ρ = -0.260, n = 8,233
sign differs in 60% of genes
(expected if unrelated: 50%)
Δα in liver (raw prior, centered)
